## NOTICE

The following images are for references only, some details might change

## MARKET SCENARIO

# MARKET SCENARIO

The current world of mail delivery market:

- 4W truck/vans has been still using as the main product.
- 2W/3W scooter is used in a tactical operation mission covering the last mile.
- Bicycle and E-Bike for very short fare.

The 2W are used in the last mile operations in traffic jam in congested area, they are also convenient than 4W thanks to lower management costs.

# MARKET SCENARIO

## ASPETTI POSITIVI

## ASPETTI NEGATIVI

### Track/Van

- Good load capacity.
- Good weathering protection.

- Poor agility in city traffic.
- High management costs.

### Scooter/E-Scooter

- Poor agility in city traffic.
- High management costs.

- Low weathering protection.
- Low load capacity.

### Bike/E-bike

- Low management costs.
- Good accessibility in city center.

- Low speed.
- Low weathering protection.

## PIAGGIO'S PROPOSAL

## LIBERTY DELIVERY UNIQUE WINNING POINTS

Scooter specifically designed for delivery applications, the key points are:

- **Single seat:** the load is placed towards the central side, that increases driveability and the load capacity.
- **Load capacity:** rear rack payload 40 kg, front rack payload 25 kg, 2W scooter with the best load capacity in the market.
- **High-wheel scooter:** guarantee more **safety** and **stability**.
- **Specific accessories:** insulated food box to keep the food temperature.
- **Homologation:** includes top boxes and bags.
- **Maintenance:** engine oil change interval once every 10.000 km: Piaggio's engine is more efficient and reduces maintenance costs.
- **Service:** Extended Piaggio Service Network in the Market guarantee technical assistance and availability of original spare parts.

## MYMOOVER UNIQUE WINNING POINTS

Specifically designer scooter for delivery applications., the key points are:

- **Single seat:** the load is placed towards the central side, that increases driveability and the load capacity.
- **Stability and safety:** guaranteed by 3-W both when braking, driving on curves, on sliding roads, potholes ...
- **Load capacity:** 60 kg/261 L on the top box, 25 kg on the front side, Mymoover is the scooter with the best load capacity in the market.
- **Parking:** no need the stand, consequently save time.
- **Maintenance:** engine oil change interval once every 10.000 km: Piaggio's engine is more efficient and reduces maintenance costs.
- **Telemetry:** the vehicle movements and parameters are monitored (Targa Telematic), the cost are optimized and in case of accident it is possible to promptly intervene.
- **Service:** Extended Piaggio Service Network in the Market guarantee technical assistance and availability of original spare parts.

# PIAGGIO MYMOOVER TARGA TELEMATICS

Mymoover may have “Black box” and “Badge reader” both standard or at a later time as accessory.

La **Black box** collects and sends in real time vehicle data to the head office.

The head office processes these data and sends the report to the customer. An example of processed data are: geolocation, vehicle speed, fuel level, mileage, etc ... The telemetry service is on demand.

With the Premium service it is possible to have maintenance alert, accident notice, fuel consumption, driving style, path report, etc ...

The **Badge reader** is a driver identification system, through which the owner of card, or devices like smartphone, handheld, after the match can drive the vehicle.

Black box e Badge reader are located in the handlebars.
